

2007 Gulfstream G150

With ample space inside the cabin, the Gulfstream G150 is a medium range, business aircraft that is well known as a high performance aircraft in private jets. The G150 has a range of 3,400 miles at a top speed of 537 mph. Our G150's Executive Configuration can hold up to 9 passengers. The G150 has a beautiful cabin that includes large captain's seats, 4 of which can convert into two lay flat beds, plenty of leg room, a full private lavatory and large baggage compartment. The cabin also includes an airshow moving map of the route of the flight, dimming cabin lights, a DVD player, Satellite Phones, and power outlets along with a variety of other conveniences. The Gulfstream G150 is the fastest, most comfortable and luxurious mid-sized business jet in the skies today.
